

# The growth of the exhibition area GasSuf 2017

GasSuf is the only exhibition in Russia dedicated to using gas for transport, and one of the leading events for using gas motor fuel to make transport more energy efficient and environmentally friendly.

GasSuf is a fast-growing venue that promotes the expansion of business horizons, the establishment of new business links, and the launch of new products in the market.

According to provisional results of 1<sup>st</sup> half year 2017 exposition area shows increase by 30% compared with the year 2016.

We would like to invite you to demonstrate your products and business capabilities at the largest Russia's exhibition of NGV vehicles and refueling equipment [GasSuf](#), taking place from **17 to 19 October 2017 in Moscow, Russia**.

Commercial effectiveness of exhibit is confirmed:

**1. Exhibitors' feedback**

**73%** found new clients and business partners

**97%** satisfied with the number of visitors

**94%** satisfied with quality of visitors

**2. Participation of leading international manufacturers of equipment**

Graf, Fornovo Gas, Schwelm Anlagentechnik, AG Centrum, DIGITRONIC, LANDI RENZO, LOVATO

**3. Positive testimonials from exhibitors:**

*We are representatives of the Czech VÍTKOVICE holding. One of our directions is manufacturing of cylinders for technical gases, namely methane. We participate in the exhibition not for the first time. For our company it is important, we found new customers, introduced new products, such as MGFS and gas equipment for CNG filling stations. The exhibition was held in the good hall. There were a lot of people. And the fact that we met partners and competitors, suggests that the CNG market is growing in Russia.*

— **Shishka Vladimir**, Commercial Director **Vitcovice Rus**
